## // EXPERIENCE

### GREEN SEEDS DESIGN, LLC

2005 - PRESENT

#### Web Developer, Web Administrator

My accomplishments include: over 60 websites, running successful SEO and AdWords campaigns, and building unique and powerful systems for hosting and client specific applications. I administrate the Centos WHM/Cpanel driven server. My job duties include managing the company's main site, blog, SEO, software upgrades, and server security.

### INSTABILL CORPORATION

2012 - 2014

#### Web Developer, Web Administrator

I administrate 6 servers with over 25 websites and business critical applications. I have designed and developed 19 websites, over 350 page updates, 8 content management system upgrades, and deployed multiple servers including a 3 server service specific system (OpenBSD using Nginx as a proxy, a second server for file serving, and a database server). I launched a successful ORM campaign and managed to deploy a successful Google AdWords campaign including retargeting. Most recently I redesigned the Instabill.com homepage and increased conversions by 54%. My daily job duties include managing the company's business sites, server side security updates, micro-site development, SEO, web administration and graphic design.

### TECHNOLOGY USER GROUP

2002 - 2005

#### Web Developer, Web Administrator

In 2002, I co-founded The Technology User Group Initiative in Portland, Maine. I set up a server (using Ubuntu and a LAMP stack) and began hosting and designing sites. I designed and deployed over 50 websites and numerous web applications.
